people of good will on both the left and the right are secretly asking themselves the same question how has the conversation on race gone so crazy bestselling author and acclaimed linguist john mcwhorter argues that an illiberal neoracism disguised as antiracism is hurting black communities and weakening the social fabric we re told to read books and listen to music by people of colour but that wearing certain clothes is appropriation we hear that being white automatically gives you privilege and that being black makes you a victim we want to speak up but fear we ll be seen as unwoke or worse labelled a racist according to john mcwhorter the problem is that a well meaning but pernicious form of antiracism has become not a progressive ideology but a religion and one that s illogical unreachable and unintentionally neoracist in woke racism mcwhorter reveals the workings of this new religion from the original sin of white privilege and the weaponization of cancel culture to ban heretics to the evangelical fervour of the woke mob he shows how this religion that claims to dismantle racist structures is actually harming his fellow black americans by infantilizing black people setting black students up for failure and passing policies that disproportionately damage black communities the new religion might be called antiracism but it features a racial essentialism that s barely distinguishable from racist arguments of the past fortunately for all of us it s not too late to push back against woke racism mcwhorter shares scripts and encouragement with those trying to deprogramme friends and family and most importantly he offers a roadmap to justice that actually will help not hurt black people a new york times bestseller

A: This fear often originates from:

- Past Trauma:** Childhood experiences involving yelling, physical abuse, or harsh parental discipline can profoundly shape an individual's response to raised voices. The fear becomes a learned response, associating loud voices with threat or danger.
- Insecure Attachment Styles:** Individuals with anxious-avoidant attachment styles might be particularly sensitive to criticism and conflict, fearing rejection or abandonment even from seemingly minor displays of anger.
- Personality Traits:** Individuals with high levels of neuroticism or sensitivity may experience amplified emotional responses to stressful situations, including being yelled at.
- Witnessing Violence:** Growing up in a household or environment where yelling and aggression were common can create a learned

expectation of such behavior and a heightened sensitivity to it. Cultural Influences: Certain cultures may normalize or even encourage loud and assertive communication, which can still cause anxiety for individuals who aren't accustomed to it. Q: How does this fear manifest itself? What are the symptoms? A: The symptoms can range from mild discomfort to severe panic. These may include: Physical Symptoms: Increased heart rate, sweating, trembling, shortness of breath, nausea, and muscle tension. Emotional Symptoms: Intense anxiety, fear, feelings of helplessness, shame, and humiliation. Behavioral Symptoms: Avoidance of situations where yelling might occur, people who are prone to yelling, or even anticipatory anxiety leading to avoidance of potentially triggering situations. III. Impact on Daily Life Q: How can this fear affect my relationships, work, and overall well-being? A: The fear of being yelled at can have far-reaching consequences: Strained Relationships: It can damage relationships, leading to avoidance of conflict, communication difficulties, and feelings of resentment. Job Performance: It can negatively impact work performance, causing difficulty in teamwork, public speaking, or interactions with superiors. Individuals might underperform due to fear of criticism or avoid situations requiring assertive communication. Mental Health: Chronic stress and anxiety associated with this fear can lead to burnout, depression, and other mental health issues. IV. Coping Strategies and Overcoming the Fear Q: What can I do to manage or overcome this fear? A: Several strategies can help manage and overcome the fear: Cognitive Behavioral Therapy (CBT): CBT helps identify and challenge negative thought patterns and develop coping mechanisms for managing anxiety. Exposure Therapy: Gradually exposing oneself to situations involving raised voices in a safe and controlled environment can reduce anxiety over time. Mindfulness and Relaxation Techniques: Practices like meditation, deep breathing, and progressive muscle relaxation can help manage anxiety symptoms in the moment. Assertiveness Training: Learning assertive communication skills can reduce the likelihood of conflict and improve one's ability to handle potentially tense situations. Seeking Support: Talking to a therapist, counselor, or trusted friend or family member can provide emotional support and guidance. V. Conclusion: The fear of being yelled at is a valid concern that can significantly impact an individual's life. Understanding its roots and utilizing appropriate coping mechanisms is crucial for managing this fear and improving overall well-being. Seeking professional help is a valuable step towards overcoming this challenge and building

healthier relationships and a more fulfilling life. FAQs: 1. Q: Is it normal to feel anxious when someone raises their voice, even if it's not directed at me? A: Yes, it is perfectly normal to experience some level of discomfort when witnessing aggressive communication. However, if this discomfort becomes excessive and interferes with daily life, it warrants professional attention. 2. Q: My boss often yells. Should I quit my job? A: This depends on the severity of the yelling and your ability to cope with it. If the yelling is creating significant distress and impacting your mental health, seeking a new job might be necessary. Consider speaking to your HR department about the situation before making any drastic decisions. 3. Q: My partner yells at me sometimes. How can I address this? A: Open and honest communication is key. Express your feelings calmly and clearly. Couples therapy can be extremely beneficial in resolving communication issues and establishing healthier conflict resolution strategies. 4. Q: Are there medications that can help with this fear? A: While there's no specific medication for the fear of being yelled at, anxiety medications like SSRIs or benzodiazepines can help manage the symptoms of anxiety and panic associated with this fear. A doctor or psychiatrist can determine if medication is appropriate. 5. Q: How long does it take to overcome this fear? A: The time it takes to overcome this fear varies greatly depending on the individual, the severity of the fear, and the chosen treatment methods. With consistent effort and professional support, significant progress can be made over time. It's a journey, not a race.
